This 2-day training course will provide in-depth knowledge & skills needed to install and troubleshoot Mr. Slim M & P series systems. Throughout the 2 days you will be introduced to the concepts and theories of Mr. Slim operation, including an in-depth functional study of the unique technologies employed and so much more.

COURSE FEATURES:

- Hands-on instruction from CSIpgh Technical Advisor, Rick Boucher
- Describe the system components & characteristics
- Interpret the system functions and capabilities
- Determine typical operation, pressure & temperature readings and voltage measurements
- Calculate the appropriate system refrigerant charge
- Troubleshoot the system, identifying and isolation system faults
- Describe the system installation location requirements and so much more!
