

CSIpgh Presents:

A/S FURNACE TRAINING

This 4-hour course covers the current American Standard Furnace lineup, and is a perfect introductory course for beginner technicians! Seasoned vets will also find value in retaking this course and brushing up on their existing product knowledge.

In this course you'll learn:

- General service, installation, and maintenance of A/S furnaces
- Differences between communicating and non-communicating systems
- Typical operation, pressure & temperature readings as well as voltage measurements
- Differences in servicing single stage, 2-stage, and variable speed furnaces
- How to troubleshoot the system, identify and isolate system faults

Weds. 10/31,
